The DLC overall wasn't terrible, just not worth the time it took to play Pros- +Powerful weapons and lots of ammo +Interesting setting +a very cool ending +Fun characters from different eras of time (Cowboy, Prewar soldier, etc.) Cons- +Too long without very much diversity +Fighting aliens was novel at first, but got dull quickly +not worth \$5 +lots of shooting with few RPG elements Overall: Only buy if you are into shooting and pushing buttons for 4 hours. The DLC is very in-depth and I love the way the story is introduced to the player. The fact that you have so many choices in this DLC compared to many other games are very astounding and show that this DLC is ready for playing and ready for beating.. I liked it, and it's worth a buy, but compared to the other DLCs it's the weakest.. friggen awesome. This DLC sucks. Adds barely anything into the game. Only a few new weapons are added. The quests are long and are boring. u2665u2665u2665u2665 this DLC. EDIT: To anybody who thinks I don't like this game, I love the actual game, but do not bother with this DLC, you will regret it if you don't listen.. This DLC sucks. EDIT: To anybody who thinks I don't like this game, I love the actual game, but do not bother with this DLC, you will regret it if you don't listen.. i want to vote no on recommending this dlc because it has so many glitches, but i voted yes, aside from the aliens being hard to kill and the TelePrompTers not working when you need them too. i hope the problems get fixed.. Mothership Zeta is definitely one of the best DLCs I've ever played on any game. if your character uses energy weapons, then you should buy this DLC. It was extremely fun, and I loved the stereotypical aliens.
